SPECIALITY VEHICLES DIVISION

WHO WE ARE

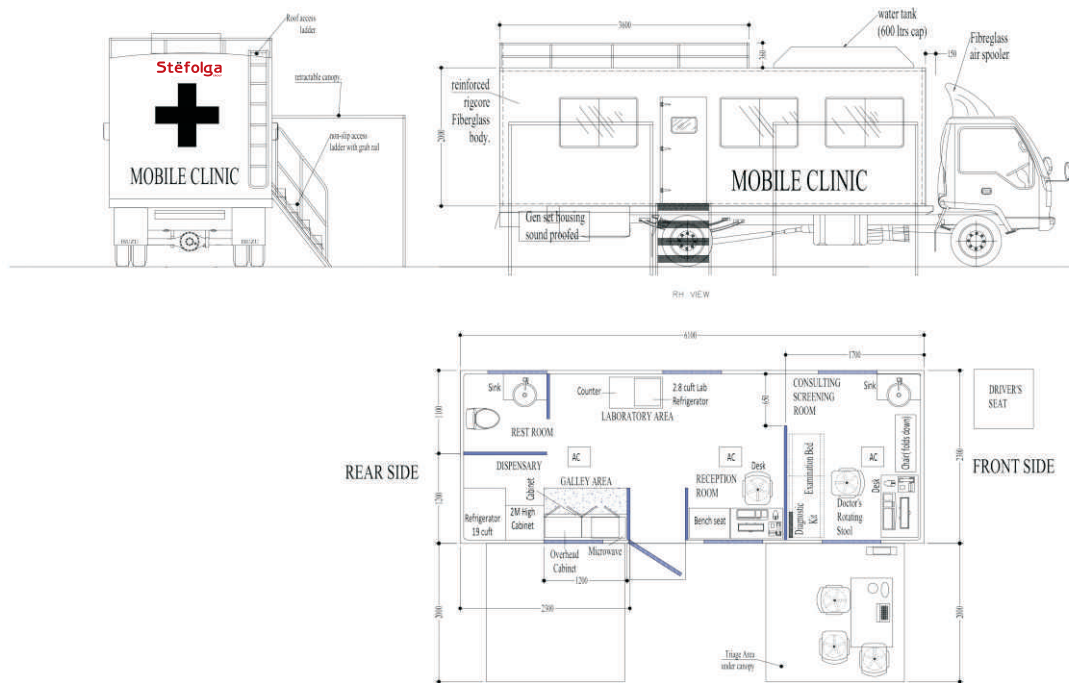

S

tëfolga Group has been serving the industry since 2003 in different capacities with specialty in providing engineering infrastructural support and turnkey maintenance of equipment for mobile and standard primary and secondary health facilities especially in oil producing areas. We offer a complete turnkey machinery solution to our clients. We perform a 'Customer Needs" evaluation, equipment selection, machine purchase, foundation design and construction, machinery shipping, installation and commissioning.

Stëfolga's Specialty Vehicles Division specializes in the design, fabrication and service of Mobile Health Clinics (MHC) such as Bloodmobiles, Mobile Dental Clinics, Mobile Exam Clinics, Mobile Maternity Clinics, Mobile Mammography Units, Mobile X-ray Trailers and Mobile Laboratory Unit. With over two decades of combined experience in the industry, our specialty vehicles division has delivered comprehensive solutions to remote regions in South America, Asia, Middle East and African Countries.

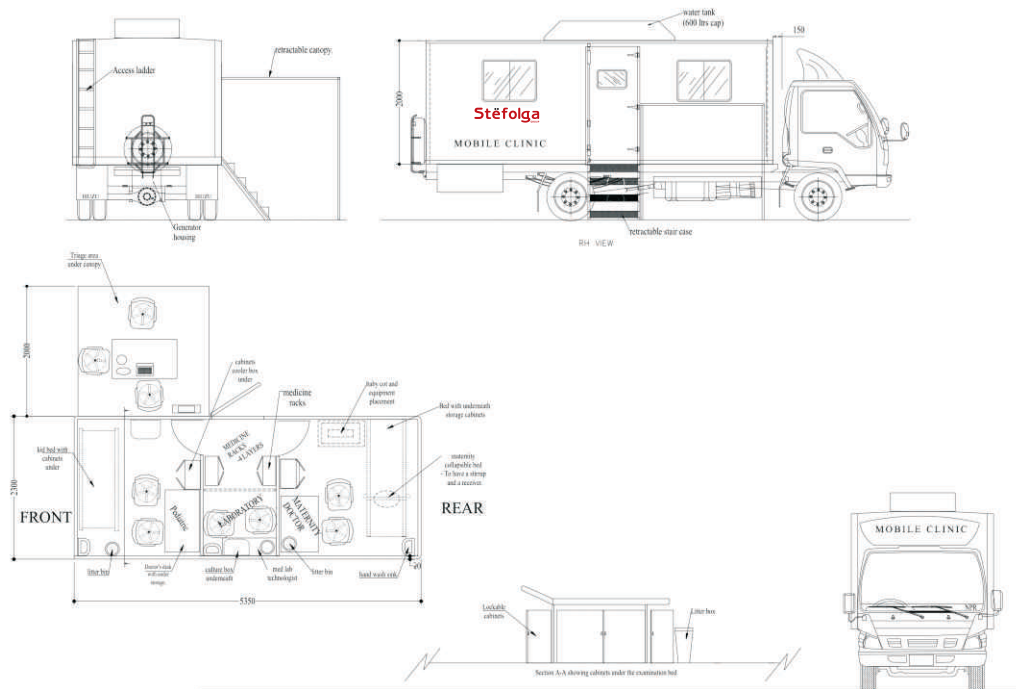

Today, medical healthcare providers are increasingly appreciating and turning to the adoption of mobile health clinics to expand their medical assistance in both rural areas and urban centres and emergency situations. Providers are attracted to the flexibility and efficiency of the mobile health clinic for delivering vital healthcare services, especially for under-served populations. These advancements are bridging the gap between the mobile health clinic and a fixed-site hospital, and have made timely patient-professional consultation more attainable.

Stëfolga in partnership with leading indigenous Non-governmental organization established with the support of the United States Government President's Emergency Plan for AIDS Relief (PEFAR) has deployed the mobile health clinic services and units in some states of the Federation, amongst which are Delta State, Abia State, Taraba State, Niger State, Ogun state and Lagos state.
